

Unrecoder

A cipher arrives from the expedition.
How you read it decides the fate
of the team and every member.

BY	N. Doroshenko	Unrecoder	NO. 01
DATE	2026.10		SHEET 1/9
SCALE	1:25000	GAME PITCH	THEME わ

2

Theme: わ

I read 「わ」 as the "wa" in *wakaru*, "to understand".

I wanted to turn this everyday word directly into a game mechanic.

In this game, the cipher can always be solved.

But that does not mean you truly understood it.

3 Overview

You play a radio operator who decodes ciphers. You read coded messages from the expedition and tell the team what to do next.

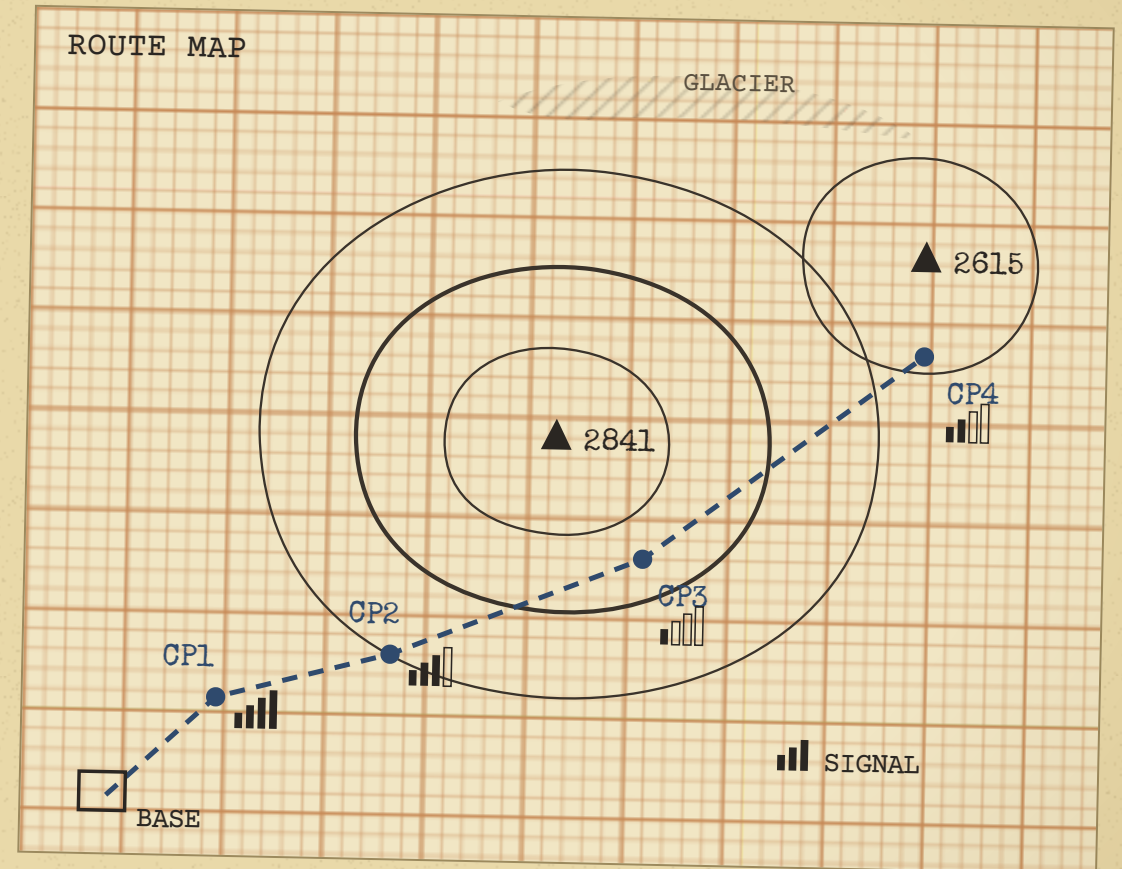

The expedition has 10 members. They cross rock and ice in the mountains, following checkpoints set by the team before them.

Their work: collecting samples and repairing the route, mountain huts and equipment.

The deeper they go, the worse the signal gets. Depending on the location and the equipment on site, it can also get better.

SPEC

Platform	PC (Steam)
Playtime	3-4 hours
Audience	Players who love puzzles and riddles

The moment it clicks

72abc

↓

"Team reached CP4. The bridge is broken."

Using the code table, scattered symbols come together into one sentence. You understand what is happening to the team and what you need to tell them.

The moment you realize you were wrong

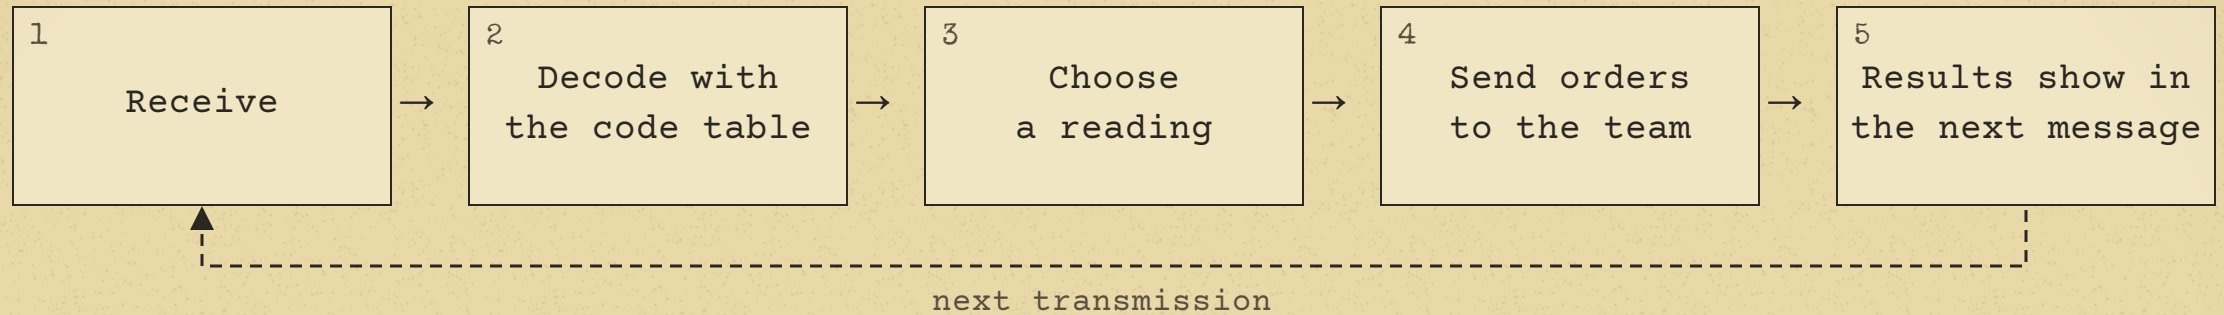

7kd2r

↓

"The bridge collapsed. One member injured."

You find out you were wrong in the next transmission. The team did something unexpected, or you realize your reading was off.

5 Game Loop

CIPHER

72abc pref2 8645r mork4

Blocks of digits and letters.

One symbol = one word. One block = one sentence.

Only 1-2 symbols per transmission have 2-3 meanings.

Those symbols decide the outcome.

ORDERS (CHOOSE 1 OF 5)

Continue

Wait

Back to last CP

Hurry

Return to base

Each message from the team says where they are, what they are doing, their condition, and what they plan next.

The code table changes every transmission, so codes cannot be memorized. What stays the same is the rule for building tables. The player learns that rule.

Radio log excerpt - received 14:32

72abc

CODE TABLE (THIS TRANSMISSION)

7	team
2	CP4
a	reached
b	bridge
c	broken / repaired

Reading A ✓

"Team reached CP4.
The bridge is broken."

Order: Wait
Next message: All safe.
Looking for another route.

Reading B ✗

"Team reached CP4.
We repaired the bridge."

Order: Continue
Next message: The bridge
collapsed. One member injured.

HINT

CREW LIST

01	Leader - CP4
04	<u>Repair tech - injured last message, stayed at CP3</u>

→ No one on the team can repair the bridge now. So A is correct.

7 No Game Over / Intuition

There is no game over. But team members can get injured or die.

If decoding goes well, the team stays on plan, and no one dies, you earn Intuition Points.

Spend Intuition Points to auto-fill symbols that have only one meaning. Symbols with 2-3 meanings you always read yourself.

Whatever reading you choose, the game keeps going. The reading you choose becomes an event, and the fate of the team.

Whether it matched their real situation, you learn in the next transmission.

DECODING SHEET

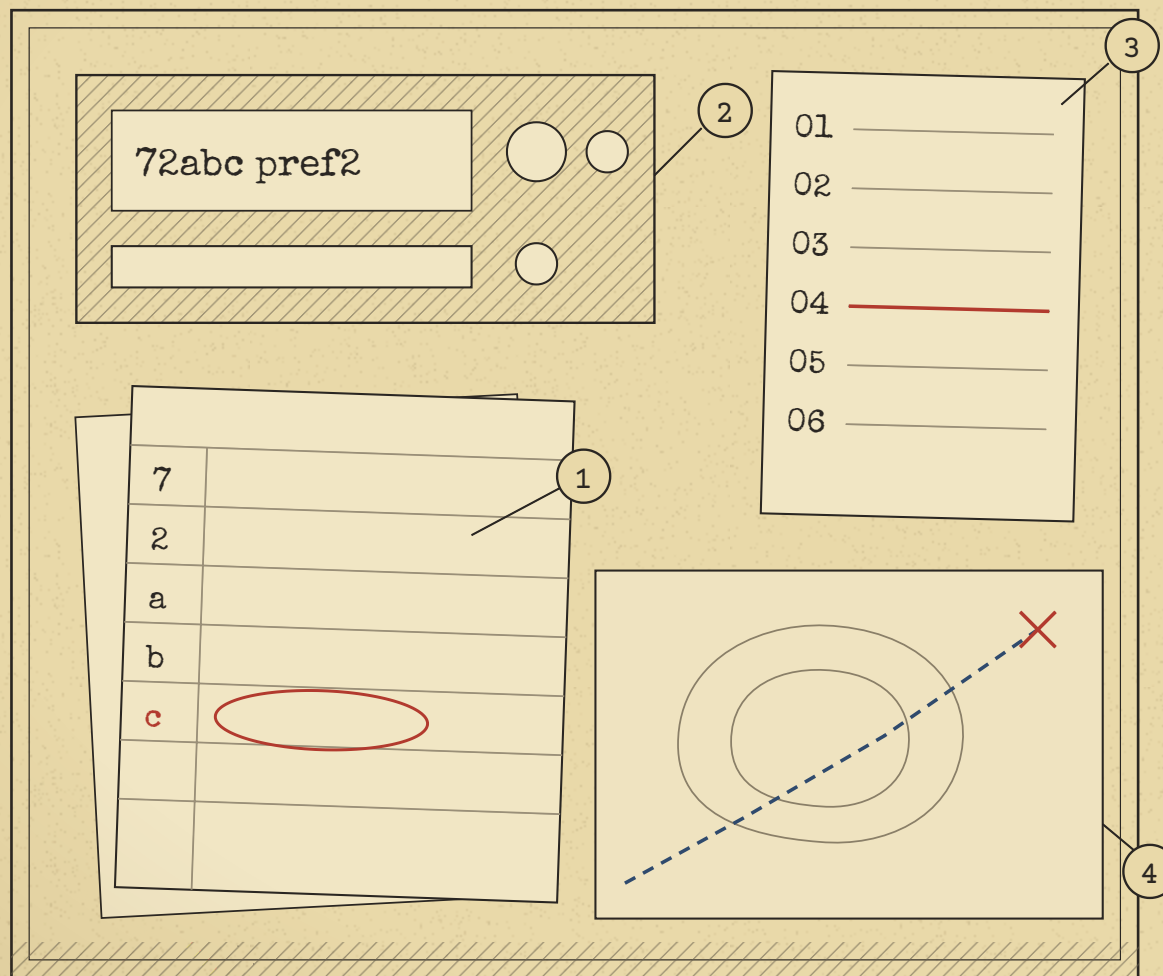

7 team AUTO	2 CP4 AUTO	a reached AUTO	b bridge AUTO	c ?

8 Screen Layout

- ① Code table sheets on the desk.
- ② Radio screen showing the code from the team.
- ③ On the right: crew list and roles.
- ④ Below: the map. Mark it after every transmission.

Return of the Obra Dinn

Deduce the fate of 60 people aboard a ship from clues.

→ A game about what already happened.

Papers, Please

Judge entry using documents on your desk and rules that grow every day.

→ You check documents and decide right or wrong.

Radio Commander

Command units using only radio reports and a paper map.

→ The reports themselves are clear.

The Message from Deep Space

Decode an alien language from scratch over the radio.

→ A game about finding the correct translation.

Unrecoder

The cipher can always be solved.

But you decide which meaning fits the situation right now.

Your decision moves living people.
